COMPLIANCE & CERTIFICATIONS

What Happens After an Incident When Your Installer Cannot Prove Compliance

After a break-in or a failed door, the first questions from an insurer, assessor or board are rarely about camera resolution. They are about who installed the system, whether that person was licensed, and whether the maintenance records hold up.

Three questions to be ready for →

QUESTION 1 OF 3 · WHAT YOU MAY BE ASKED

Who installed it, and were they licensed?

THE RECORDS TO HOLD

Proof of who did the work

A Certificates of approval held by the staff who carried out the work.

B Required under the Private Security Personnel and Private Investigators Act.

QUESTION 2 OF 3 · WHAT YOU MAY BE ASKED

Are your access-controlled doors recorded correctly?

THE RECORDS TO HOLD

Your compliance schedule

A Access-controlled doors on a compliance schedule, recorded correctly.

B Confirmed when you take over a system from a previous provider.

QUESTION 3 OF 3 · WHAT YOU MAY BE ASKED

Do the maintenance records hold up?

THE RECORDS TO HOLD

A documented trail

A. A record left by every service visit.

B. As-built drawings, device lists and maintenance history in a form you can produce on request.

THE OUTCOME

A business that can show, quickly and in writing, that its security was installed and maintained properly by accountable people.

That evidence is what reduces risk exposure when something goes wrong.
